- ▶ Environment Care
- ▶ Air Purification
- ▶ Temperature Control
- ▶ Scene Control

Smart Home – Control Terminals

Smart Home – Function & Security Modules

Health Management System

Health Management System

Model: TC-HM

Features

- Health Data for each family member
- Wireless connecting to the data station
- Reminding with the big data analyze

Environment Care System

Environment Care System

Model: TC-IKair

Features

- Air quality data realtime indicate on the control terminal
- Detect available with:
PM, Temperature, Noise, Formaldehyde, Humidity
Light, VOCs, Air Quality, Carbon Dioxide
- Linked control with the lighting control system
- Linked control with the temperature control system

Background Music System

Background Music System

Model: TC-BGM

Features

- RF and IR remote control
- Multi source for music input
- Easy programme for each room
- Hi-Fi music system

RGB LED Scene Light System

Model: TC-U9LED-A

Features

- RF wireless remote control
- Linked control with the Scene touch switch
- True color with full range
- Color and change frequency adjustable
